

MIYUKI BRACELET

**DIY
INSTRUCTIONS**

MAKE YOUR OWN MIYUKI BRACELET

EASY TO LEARN

FUN

COLLECT THEM ALL

KIT INCLUDES

Congrats on purchasing your Meraki Pop DIY Miyuki bracelet kit!! Im so excited to share the craft with you! I hope you get hooked like me!

Each kit has enough supplies to make two bracelets that will fit up to an 8" wrist. I also put in a few extras just in case, cause stuff happens.

Collect them all!

Beware this is absolutely addicting and relaxing

- Tin Box (reusable)
- Mix Miyuki Beads
- Elastic String (x6, 1 extra set)
- Needle (x1, pic is incorrect))
- Crimp Beads (x3, 1 extra)

Additional supplies you'll need are:

- Pliers
- Scissors

SETTING UP

Remove contents from container. If you don't have a bead pad, that's ok because the Miyuki beads are flat and wont roll. There are two approaches:

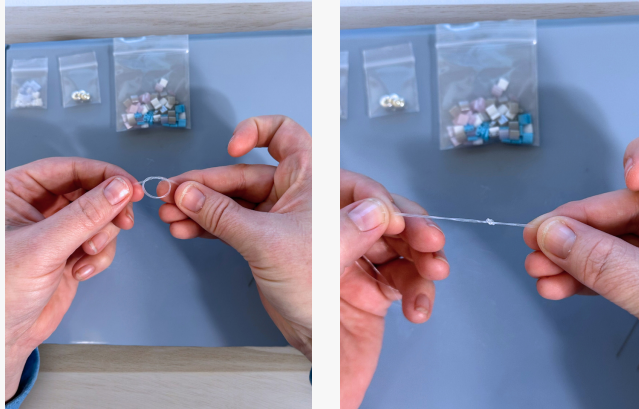

1. Lay beads in the pattern you want
2. Wing it!! Go ahead your a rebel

💧 YES I AM A CRAFTER 💧

MAKING

1. Take two clear elastic strings and make a knot at one end

2. Thread the needle on one string

3. Thread beads on first string

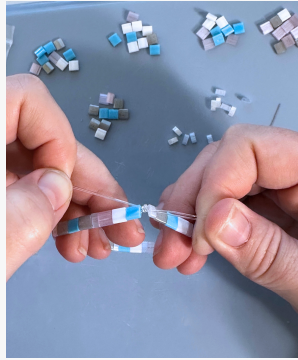

4. Remove needle, and thread the second string

5. Starting at the knotted end, thread second string thru the beads

MAKING

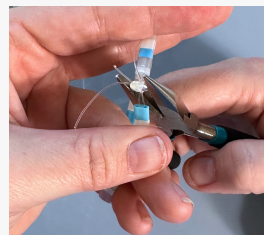

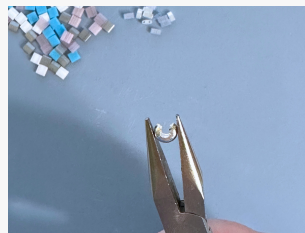

6. Tie both ends together (making several knots).

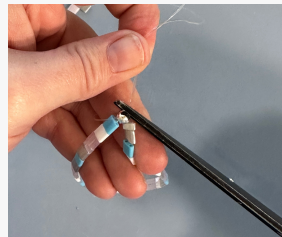

7. Stretch bracelet to tighten knots. (Elastic is strong, you'd have to pull REALLY hard to brake)

8. Secure Crimp Bead around the Knot, (Tip: Pull beads away from knot so your plyers don't accidentally break the beads, they are made of glass)

9. Cut excess string (tip: Careful not to cut the wrong string)
